

MEGATRADE101

MEGATRADE101 COURSE / TRAINING PROGRAM

The Right Trading & Information Resource Course

DESCRIPTION

MEGATRADE101 COURSE & TRAINING PROGRAM is a comprehensive and intensive key financial program for experienced traders and investors. This is in partnership with Pereti Training Institute – an advocate for professional training education. These programs are divided into two tier (2) module which provides a well defined and continuing educational initiative for financial market participants such as traders and investors in the US Stocks / Spot Foreign Exchange / Commodity Futures and coverage of other pertinent financial markets in Asia, Europe and the US.

The series of training program starts with a 60 hour (40/20) session up to 120-hours (60/40/20) schedule depending on the choices made that puts emphasis on the list of topics below; not necessarily in their respective order.

- ✦ Market Information on the Primary & Secondary Financial Markets
- ✦ Correlation of Fundamental & Technical Analysis
- ✦ Portfolio management: Risk / Reward ratio
- ✦ Enhancing Trading Skills and Proper Timing Execution
- ✦ Financial Market Regulations and Compliances / Guidelines
- ✦ Market Dynamics / Mechanics Trading & Investing Methods
- ✦ Real-time Applications of Trading and Investing Principles
- ✦ Market Strategies to Improve Wining Probabilities

In addition, institutional participants will cover a total of 240 hours which is not included in the list above. All schedules shall be on-site and on-line via Skype or Google which would be incorporated with the program schedule, depending of the time allocation of the individuals or grouped training. These are just some of the most important highlights that we have in the series training that can lead to a successful financial journey for every trader and investor.

- A preliminary Evaluation, Assessment & Recommendation schedule would be made for individual participants based on their level of expertise, experience and knowledge.
- The flexibility of the program schedule is for participants to be able to choose which ones they would be able to concentrate and enhance what they already know including those that they are not familiar with.
- At times, in part delivering excellence in our program we will be inviting qualified market practitioners who have the authority and with extensive knowledge of the financial markets which would include the stocks and insurance industry that are engaged in multiple funds as part of portfolio diversification.
- An Open Forum discussion format is applied to maximize knowledge sharing among the participants, in-class group and individual analysis is included in the exercises, while assignments are assigned to ensure that the participants have a clear comprehension and appreciation of the program content.

OBJECTIVES

1. To provide a continuing educational initiative and learning process for the new & experienced traders including main street investors that would be able to enhance their knowledge about the financial market industry, how it works with specific focus on the equities, foreign exchange and the commodity industry.
2. To provide the right trading & information that can only enhance the concept of investing in the financial markets with the proper attitude & approach. This includes a better understanding of trading that can only enhance their knowledge by improving the analytical skills of investors and industry practitioners; whether they are new and or experienced in the industry.
3. To promote a well balanced financial wellness for investors and industry practitioners, where the overall social responsibility for society would directly benefit from.

PROGRAM CONTENT

Benefits of the Training Workshop

- ✦ The training workshops are unique and considered a class of its own to achieve trading excellence by properly timing trade executions that can only deliver high probability trade results. The sessions conducted are in real trading hours and are in line with current market conditions effectively useful for each valued participant to fully relate and apply appropriate strategies towards market price action while undergoing their respective training program.
- ✦ Equal importance is emphasized in keeping market perception in check with a properly aligned analysis to avoid deviating from the original trade plan setup prior to trade execution. Remember, prices fluctuate in both directions especially when viewing chart formation in several time-frames can add to uncertainty and confusion at times.
- ✦ Learning to adapt to market conditions is critical, while remaining firm on any conclusive analysis derived from either market fundamentals or technical trade setups would be re-tested by daily price swings within the three (3) major trading sessions. It is where 'flexibility to Adapt' becomes a distinct characteristic for a successful trader's mindset and trading skills.
- ✦ Experienced traders and sophisticated investors that possess these distinguishing traits can not be an integral part of a common logarithm embedded in an equation in trading these markets.

On Actual Trading & Investing:

- 1) Learn to Identify** the right currency pairs / stocks / financial instruments that would be most affected based on the Calendar of Events for the week and / or for the month. Fundamental drivers or related news critical for a market swing that investors and traders would react to before and after such data released. This includes the overall market sentiments or expectations prevailing at the time of trading reference. Likewise, this method would be segregated into a weekly, monthly and on a quarterly basis in line with a quarterly performance trade report on realized / unrealized return on equity.
- 2) Follow a certain process of deduction** based on performance or under-performing Stocks or other financial instruments in the limelight. Gainers / Losers / market movers and fundamentally game changing movers related to market expectations would be properly monitored to derive choices of instruments to be traded. And for Currency pairs would be the strength and weakness of the majors and their respective correlated cross rates which includes central banks interest rate differentials and monetary policies.
- 3) Focus on improving properly timed execution of trades** for traders and investors who elects to trade the foreign exchange market. This is done after each trader / investors have been able to derive a definitive choice/s as to the appropriate currency pair/s to trade with. A combination of technical tools of the trade would be most useful to compliment basic strategies as a cushion against adverse price fluctuations in the market.
- 4) Not all technical approach is applicable in all instruments. Know & Apply the right tools based on their respective idiosyncrasy and characteristics** distinguishable only to the most experienced trader and strategist. Selected trading time-frames for proper execution should be considered for entry and exits. Variable conditions within the three major market sessions are important to consider.
- 5) Portfolio Modernization** that includes High Yielding Dividend Stocks, Major Indices, Exchange Traded Funds ETFs with almost the same liquidity, transparency and security of holding triple rated A+ / valued instruments that has a exponential growth prospects over a specific period of time exposure.

WHO SHOULD ATTEND & WHY?

The overall program is designed specifically for:

- Investors and Corporate clients willing to have access to Primary and Secondary markets in the Global market arena that can provide a higher market liquidity, transparency and a higher rate of market potential and rate of return on equity investment.
- All levels of traders, from the new trader to the most experienced trader and sophisticated high net worth individual investor who has a good understanding and basic knowledge of stock investing and trading the Spot Foreign Currency Market who would like to manage their respective trading and investment portfolio.
- Trading participants and or industry practitioners who want to enhance their investment experience in trading these markets, while developing effective analytical skills that can only improve / identify trade setup, market timing and proper execution.
- Individuals interested to learn about the global financial markets, particularly, the US Stock Equities market, the Spot & Futures Foreign Currency & Commodity Trading. This way, they would be able to apply this working knowledge in actual investments and to successfully manage their wealth & assets to have a better rate of return for the investment decisions made.

MegaTrade101 does not make any representations of guarantee that trading results from the market analysis would be the same with other investors. In essence, investors who would want to participate in the Foreign exchange market should first consult and seriously consider their financial conditions before engaging into a volatile market such as foreign exchange Trading. And that is because losses on investment capital in part or in whole do occur in trading these types of markets, especially when trades are poorly and are not timely executed in the market. Due Diligence is advised! Full Disclaimer Apply
